

**Women of Greece, with the female citizens of the world and the men of good will who progress with you, it is time to build a new society. Everything is at hand! The era in which we live is unique.**

**Women of Greece, you are the ferment of the Society of the Third Millennium; the train of the great History of the Human Civilization is at the station of Athens:**

### **TAKE IT!**

**THE GREEK CIVILIZATION IS THE ETERNAL PHARE OF THE HUMAN PROGRESS.  
WOMEN WILL GIVE THE MOST POWERFUL IMPULSE TO IT.**

Greece is not a country like any other. It is the origin of the diffusion of the democratic ideals which 2,500 years ago gave birth to what is called the "First Democracy". It will be Greece that will give to this political system the essential and final attributes of the "Accomplished Democracy" of the Third Millennium. The situation of Humanity can not continue any longer through the current approach. It is clear that the turbulence in Greek public life won't stop questioning us and encouraging further action. Indeed, no structured reform, driven by a widespread ideal, could be organised with the present functioning system of the Greek state which is only a little democratic just as our other "democracies". The future of our planet is at crossroads with only two possible destinations:

The "New World Order" or the "Civilization of the Third Millennium".

There is no other. The best impulse will come from Greece and nowhere else. For now, the "New World Order" is expected by most people, willingly or not. We have been told so many times that there is no other alternative! Some people hope to profit from it; but the vast majority of the people knows that they could only suffer it. The greatest fears of the well-informed people are not exaggerated, given the disasters that are already in progress...and those more terrible ones which are programmed. This era is prepared by the criminal caste led by big bankers who, for two and a half centuries, are working on the advent of the "New Order" by plaguing financial crises, wars and robberies. This time is expected by villains without borders, who don't want to be subject to any law but want humanity to be submitted to their "law". It is true that at the moment their master is "their" money: or rather the money they have robbed us, that is the fruits of our and our parents' labour. The self-proclaimed leaders of transnational companies, drunk with the promises of paper money made by the banksters, have abdicated in exchange for lucrative contracts and submission. Such humiliating submission is either imposed or suffered or accepted by most of the political, media and military casts. They prefer to look elsewhere when the oligarchs publicly insult them (1). The corruption of their minds is such that, with impunity, they all use and abuse the benefits they have arrogated to themselves through underground manipulations organized in the shadow of their congregations (2). They are convinced that they and their descendants will escape from the consequences of their morbid delirium by extending their totalitarian power to the entire planet. The dawn of the major tragedy they want multiplies their excitement while at the same time it darkens our sky day after day. They activate their work tirelessly to continue strengthening the stranglehold of "their order" and the tempo of their scenario, even if the citizen populace is more and more aggrieved. Despite the anaesthetizing propaganda suffered, the citizen populace feels its destiny to escape and come to the worst with this "programmed disorder". Just see how the final destruction of the few shreds of democracy that still remain is prepared by FEMA in the U.S. (3). In fact, never before has such a destructive force been assembled, never before have such industrial resources been mobilized and never before has such insidious media power been at work to force our bodies and minds into total submission. It is truly the great enigma of our time... How could such a concentration of intelligence with such a mixture of financial and industrial potential, only direct its energy towards the production of tools of death and domination? How could this

group of men have been showing for 250 years such perseverance in the preparation of disasters, such as terrible economic crises or wars, without a pang of their conscience to lead them back one day? This question remains unanswered for now.

Their dictatorial actions, which go against the basic foundations of human civilization, will end in a lamentable fiasco. Do not doubt it. The “New World Order” will bring shame to all those people who have linked their names to this pathetic and hopeless adventure.

Despite this armada and its huge interests, another option is making its way: it’s the construction of the “Civilization of the Third Millennium”. It is the second destination... which several personalities with a noble political behaviour are already involved with, as Lincoln or Jefferson did. Some have paid with their lives, as the Kennedy brothers, or with their career, as General de Gaulle (4). Actually, the “Society of the Third Millennium” has already been born in 2012 (5). It is on track even if it is “ignored” by most of the media. The same goes for the action of the “Biosphere for Tomorrow”, which has been initiated since 1989.

### WHO IS TO INITIATE AND ACCOMPLISH THIS MISSION OF BUILDERS?

The “homo Bellicus”? For now, we should let him rest. His reactions are strongly influenced by centuries of struggle. He has often remained stupidly dominant, despite the sanctions that history does not fail to impose on him regularly. Certainly, there is the “Real Man” who, despite the countless struggles, has never deviated from values and principles, shown and experienced by the greatest minds. They have made the non-violence, the brotherhood and the respect for other cultures a lifeline, which they have never betrayed. The “Real Man” will be an invaluable support; because obviously it’s the women who will be the leading protagonist of the birth of this movement.

The “inspired woman”? The fact that women will have a major participation in the advent of the “Civilization of the Third Millennium” can be seen from different points of view. This could be a “thank you” for the often ungrateful but still essential role they have played since the beginning of the evolution of the human civilization. It is, also, possible to think about it as a compensation for the injustices that men made them endure since the beginning of time. This could, also, be seen as a slow evolution of our democratic system that would lead to an equal treatment policy...which remains a very distant ideal. The reality is quite different.

### WHAT WOMEN WILL BRING IS UNIQUE AND NECESSARY.

Unique because only the women are able to get rid of the essential defect of the political functioning which prevents it from serving the public interest (conformism, capture of the decision networks in favour of a minority and private interests, corruption, etc...).

It should be noted that 99% of the visible oligarchy of the “New World Order” is composed by men.

Necessary because it’s unrealistic for a civilization of progress to emerge, without guaranteeing peace for all people. Only women can lead this great step forward for mankind, without falling into the nets of the financial and industrial groups of pressure, that regularly cause deadly wars, economic and ecological devastation and human suffering that hurt women deeply.

To mark the entry into the new Millennium in each country, we will ensure that the first government of the new era is made up exclusively of women. Groups of women will be formed and will travel all around the world to encourage female citizens AND male citizens to obtain the organization of the first scheduled Three Referendums from their respective governments. The aims are, first of all, that people validate this objective and, secondly, the abolition of the war punishment. This will involve that the “Map of the World Nations” is signed to obtain a common global defence. It is imperative that women are the Masters of the

implementation of this program. This is an opportunity for them to assume the importance that should be theirs in public life throughout the world. Thus, with crucial actions they will engage the future of humanity to the time when “The nations would not be taught war anymore”. And this, with the aim to achieve this goal in less than twenty years! Not even one generation! To make a government composed exclusively of women, it will be a great motivation for women AND men throughout the world to realize, that a new era is born. In Athens, the first democratic assembly was composed by men. At least, the first democratic government of the “Accomplished Democracy” of the Greek people should be composed exclusively by women. This is a powerful way to mark the advent of the “Civilization of the Third Millennium” and show that the brotherhood is not a matter of speeches but the progress toward a bright accomplishment. The women assembly will enable the switch from the “First Democracy” to the “Accomplished Democracy”.

The real Masters of the work can only be women led by the highest values, because the new society is the alternative and the antithesis to the “New World Order”.

Today in Greece, as in almost all countries, the various political factions are mainly animated by men who fight for obsolete principles, private interests or futile topics. Meanwhile, oligarchy gloats. Its plan moves on! The social explosion is close! Totalitarianism invites itself in our minds and militarism in our states. The financial logic that manipulates transnational corporations and the political game is ready to throw our civilization into a dictatorial night for its greatest benefit ... at least the oligarchy is convinced of it.

After the birth of the “New World Order”, political personalities of great value and active citizens have courageously risen up against this infamy, such as JF KENNEDY for preparing another way: the way of the global renewal of our civilization. All of the latter have predicted the deterioration of our whole society. Very early, they became aware of the harmful role of the private and hidden forces which contributed to this development in order to enslave the people and thus quench the thirst of domination of their caste. Such a project would have remained insignificant and ridiculous if it was not criminal. Criminal like no one before it and like no other could surpass it in the future.

The colonization of Greece, of Europe and of the rest of the world is not inevitable.

Meanwhile, the colonization and the devastation of Greece and the enslavement of its people are underway. Europe and the rest of the world are already severely affected. The final march of the oligarchy resonates like a baleful sound of boots from which we all thought to escape during the last century. Contention issues are dispersed in the information destined to the population in order to stir divergences. Extremism rose strongly as if radicalism was a solution! The program of Biosphere for Tomorrow combines reasonable and courageous reforms and a dynamic strategy for a rapid implementation. It has been “systematically ignored” for 23 years! It is the only program of the last French presidential election that has been “forgotten” by all the major media.

### THE SOUL OF GREECE, WOMEN, THE WORLD AND US...!

The evolution of humanity is regularly the scene of changes which may be, in some circumstances, as sudden as unexpected. Our era has all the characteristics of a period that “needs” such kind of events. In addition, the human soul is ready for these changes. It has gone through all the mirages conveyed by our society. The image, that the mirror of selfishness and individualism reflects systematically, destroys all its whims of happiness, in the domination and exploitation of the others, through the class, the nation, the race or the ethnic group. The human kind will quickly learn that it is as vital as urgent to change their personal values and the principles through which our society is operated.

The world is prepared to be put to test thanks to the actions of our glorious predecessors. The personalities, who have fought often by paying an expensive price for the building of a culture

of peace and progress, are so numerous that making a list is impossible. The most famous left traces that motivate us every day (see some of them on [www.dakttari.org](http://www.dakttari.org)). So, we should not be fooled by the omnipresence of the theories of the “New World Order” in the media. The citizens’ fight in recent years is really the result of a substantive work undertaken a long time ago in all latitudes and by the greatest minds.

Kennedy and de Gaulle showed how some people who do not share political views may serve humanity in a single impulse, even long after the end of their lives ... especially if they are guided by the defence of the general interest.

The aim was, and will always be, to build on democratic basis a universal cooperation among all States, for the progress to be accessible to all the citizens of the world into an era of peace. This approach can only be credible if the citizens are given the means to act also so as to influence the organization of global matters, with powerful tools that can be easily accepted by all countries around the world. Certainly, the proposals of “Biosphere for Tomorrow” are original but really necessary to modernize the functioning of our countries.

For Greece, it is vital. For the rest of Europe, it is urgent and for the other continents, it is inevitable. The pulse of the women will engage Greece and a growing number of countries around the world in this way.

**They will not be the black sheep who refuse globalization, but the scouts who will lead humanity to a world of progress and peace.**

PJ: (1) (Kissinger), Organizations (2), FEMA in the USA (3), Kennedy (4), General de Gaulle (5), “Civilization of the Third Millennium” was born in 2012, (6) The Great Fraud JF Gayraud.
